

August BOM

This month let's make two blocks — one with the colors reversed!

This design eliminates the need for sashing..Yea!

If the blocks are laid out by rotating every other block, there are no seams to match..Yea!

The background should be a **white on white** — your choice — please, no cream

The color is a print in **medium to dark blues** — your choice. Batiks are fine. Note that the color in block 1 does not need to match the color in block 2. Your choice. I made mine the same.

Don't use large prints as the cuts may not show off the fabric well.
